## COLORED VINYL GUIDE

Below are the 7 basic colors of vinyl. Since these colored base colors are semi-transparent (except for white and black), the color will vary depending on the lighting conditions. Please note: these values are approximate.

We can also mix these colors to achieve different colors, but the results vary and we can't guarantee matching color. Usually this involves adding white or black to a color to lighten or darken it, but note that this also makes the vinyl opaque.

### COLOR CHOICES

WHITE

CLEAR

GOLD

RED

GREEN

BLUE

BLACK

It is also possible to request marbled or swirled vinyl, where two colors are used and deliberately not mixed. Results can look quite interesting, but are not completely predictable.
