**TROUBLESHOOTING CHECKLIST:** These are the most common reasons for delays or extra charges in film outputting jobs.

- YES  NO Documents have been laid out according to Rainbo's size specifications.
- YES  NO All documents contain bleed, where appropriate. (When an image or background goes to the trim line, extend it 1/8" beyond the trim line)
- YES  NO All type and logos are at least 1/8" from any trim line.
- YES  NO All images and fonts needed to output the job have been provided. (Provide both screen & printer font parts for Postscript fonts.)
- YES  NO Images are in CMYK or GRAYSCALE mode, in TIF or EPS format—no PICTS, or JPEG or LZW compression.
- YES  NO Images are provided at high resolution (300 dpi for continuous tone, 600 dpi or higher for line art).
- YES  NO Print-outs of each document have been provided.
